## About Adobe Express
- [Adobe Express](Adobe Express) is a tool focused on bringing creativity into the classroom on a regular basis, and it has recently undergone significant updates.
- Adobe Express is available for free to all K12 educators and students.

## What's new with Adobe Express?
- The all-in-one editor in Adobe Express allows users to create graphics and videos in the same space, and it offers a wide range of templates for various purposes.
- You can now use enhanced speech recognition to animate with audio.
- Generative AI can be used to describe the image you want to see.
- Create auto-generated captions for videos and edit the text for videos and presentations.

## What can you do in Adobe Express?
- Use the ability to add images and video to have students reflect on their work in any subject.
- Users can add animations, videos, and voiceovers to their projects, which can be particularly useful for student presentations and storytelling.
