

Preparation for Exams

ChatGPT served as an invaluable tool for students studying for exams, providing comprehensive reviews of key concepts and theories, generating practice questions, and even providing tips for successful exam strategies.

PRACTICE

NOW YOU TRY example below

Chatbot, I need you to act as my science tutor. I have a biology exam coming up, and it includes the topic of photosynthesis. Can you give me a comprehensive review of the topic and provide some potential exam questions? As a seventh-grade student, I need your instructions to be clear and appropriate for my age group.

Use several different question types, such as multiple-choice, fill-in-the-blanks, or cloze questions. Ask me the questions one by one, and wait for my response. Do not answer your own questions!

Use the textbook “Prentice Hall Science Explorer” as a reference.
